Objective

Experienced Software Developer seeking a position that allows me to use my knowledge and skill in agile environments with cutting-edge technologies, by producing secure, accessible, and responsive mobile and web applications to achieve business goals

Skills

Programming: React, JavaScript, TypeScript, HTML5, SASS/CSS3, jQuery, Axios, NodeJS, ExpressJS, Java, Python, Jest, Storybook, Lerna, ampScript, Guide Template Language, bash

State Management Patterns/Architecture: Experience with Model-View-Controller (MVC) / Model-View-ViewModel (MVVM), Flux, Redux, Redux Tool Kit, Redux Toolkit Query, REST APIs

Content Management System: Adobe Experience Manager (AEM), WordPress, Shopify

Analytics & Personalization: Certona, Gigya, Salesforce Marketing Cloud (SFMC), Sumo Logic

CI/CD tools: Git, Rundeck, Bamboo, Ansible, Jenkins

Cloud technologies: Amazon Web Services (AWS), Microsoft Azure, New Relic

Experience

Canadian Tire Corporation | Toronto, ON

React Front-end Developer / Digital Information Technology   *Oct 2020 – Present*

● Collaborated with onshore and offshore teams to migrate Canadian Tire and its subsidiaries' frontend from jQuery to React. Developed cart, checkout, and browsing features, resulting in a streamlined, shared codebase with reusable components across all sites increasing developer output and resulting in fast turnaround development cycles

● Implemented user transaction components, sign-in and registration functionalities, for Triangle (a subsidiary) as part of the initiative to revamp the frontend codebase architecture with React, thereby eliminating redundant code and improving code readability and reusability, resulting in a 30% increase in revenue and better overall developer experience

● Developed Single Sign On (SSO) functionality that allows the user to sign in with the same credentials across multiple banners such as Canadian Tire, Party City, Marks, Atmosphere, and L'equipeur thereby increasing user retention by 20%

● Delivered Sales Alerts functionality on the BuyBox for all products allowing users to opt into alerts which in return generated an increase in sales and customer conversions by 10 to 15%

Android Mobile Application Developer / Mobile Technology   *Feb 2020 – Sept 2020*

● Contributed to wayfinding feature to help users to navigate stores with precision and ease
● Developed a new home screen as per design specifications improving user experience and personalization

DevOps Analyst / Cloud Operations & Automation   *June 2019 – Jan 2020*

● Created new relic dashboards based on specific rules to monitor and efficiently filter through superfluous logs while also tracking server utilization metrics
● Automated Operating System patching on servers keeping the machines updated with security fixes and critical bug fixes

Education

University of Toronto | Toronto, ON   *April 2021*
Certificate in Web Development using React

Seneca College | Toronto, ON   *June 2018*
Diploma in Computer Networking Systems Technology

University of Toronto | Toronto, ON   *April 2016*
Computer Science
